

Paul Swuste is an associate professor of the Safety Science Group of the Delft University of Technology, The Netherlands. He has a MSc degree in Biochemistry from the University in Leyden and finished his Ph.D. thesis 'Occupational Hazards and Solutions' in 1996. From 1980 onwards he is working at the Safety Science Group and engaged in research concerning exposure and control measures to occupational hazards, occupational accidents including its legal aspects in various branches of industry, including the steel industry, rubber industry, chemical industry, transport branch, building branch and the asbestos industry. Regularly he publishes on these topics in (inter)national scientific journals. From 1994 till 2008 he has organized the post graduate master course 'Management of safety Health and Environment', together with Andrew Hale. This course is an international course for safety managers.
